

TRAN DINH NGUYEN

FRESHER FULLSTACK DEVELOPER

JavaScript · React · Vue · Node.js · NestJS · RAG AI

Address: Tay Ninh City, Vietnam | Open to work in Ho Chi Minh City

Phone: +84 877453167 | Email: tdinhnguyen279@gmail.com

GitHub: <https://github.com/dinhnguyen321>

ABOUT ME

Student at Van Hien University, majoring in Software Engineering. Proficient in JavaScript, TypeScript, ReactJS, and Vue.js. Experienced in backend development with Node.js, NestJS, and TypeORM. Familiar with Basic Python and RAG AI. Having completed real-world projects, I am seeking a Fresher position to develop my skills and contribute to your team.

EDUCATION

VAN HIEN UNIVERSITY — Information Technology · Software Engineering

- 2019 – Present
- Temporary leave for military service: 2024 – 2026
- Expected graduation: 2027
- GPA (as of 2024): 3.28 / 4.0

SKILLS

Programming Languages

JavaScript, TypeScript, Basic Python

Frontend Development

ReactJS, Vue.js, TailwindCSS, Vite, Responsive Design

Backend Development

Node.js, NestJS, FastAPI, TypeORM

Databases

PostgreSQL, MySQL

AI Technologies

RAG AI, Basic Prompt Engineering

Tools & Others

Git, Basic Docker, Postman, Cross-browser Testing

FEATURED PROJECTS

CHAT-STORAGE — RAG AI Platform | 07/2026 - NOW

- Built an AI chat system supporting general conversation and document-based retrieval (RAG)
- FastAPI / Python: Document chunking, embedding generation, vector search, LLM integration
- NestJS: User management, file storage, conversation history, request rate limiting
- Safety mechanism: Automatic file rollback if AI processing fails
- Technologies: NestJS · FastAPI · Python · PostgreSQL · Vue.js
- GitHub: <https://github.com/dinhnguyen321/chat-storage>

AUTH-SERVICE — Authentication & RBAC System | 07/2026 - NOW

- User registration, login, JWT authentication, and role-based access control (RBAC)
- Optimized database design for many-to-many relationships between Users and Permissions
- Authorization enforced at backend only — never trust data from the client
- Technologies: NestJS, TypeORM, PostgreSQL, JWT, bcrypt
- GitHub: <https://github.com/dinhnguyen321/auth-service>

WORK EXPERIENCE

Center of Talent AI | Frontend Intern | May 2022 – August 2022

- Developed an AI-integrated product recognition website using ReactJS and TypeScript
- Tested and refined results returned from AI models

LAI DON | Node.js Intern | December 2022 – February 2023

- Built and tested APIs using Node.js
- Documented development processes and workflows

CAREER OBJECTIVE

- **Short-term:** Apply frontend/backend knowledge to real projects, practice software development processes and teamwork skills.
- **Long-term:** Grow into a professional Fullstack Developer, combining modern web technologies and AI to build valuable applications.
